

Networking Fundamentals

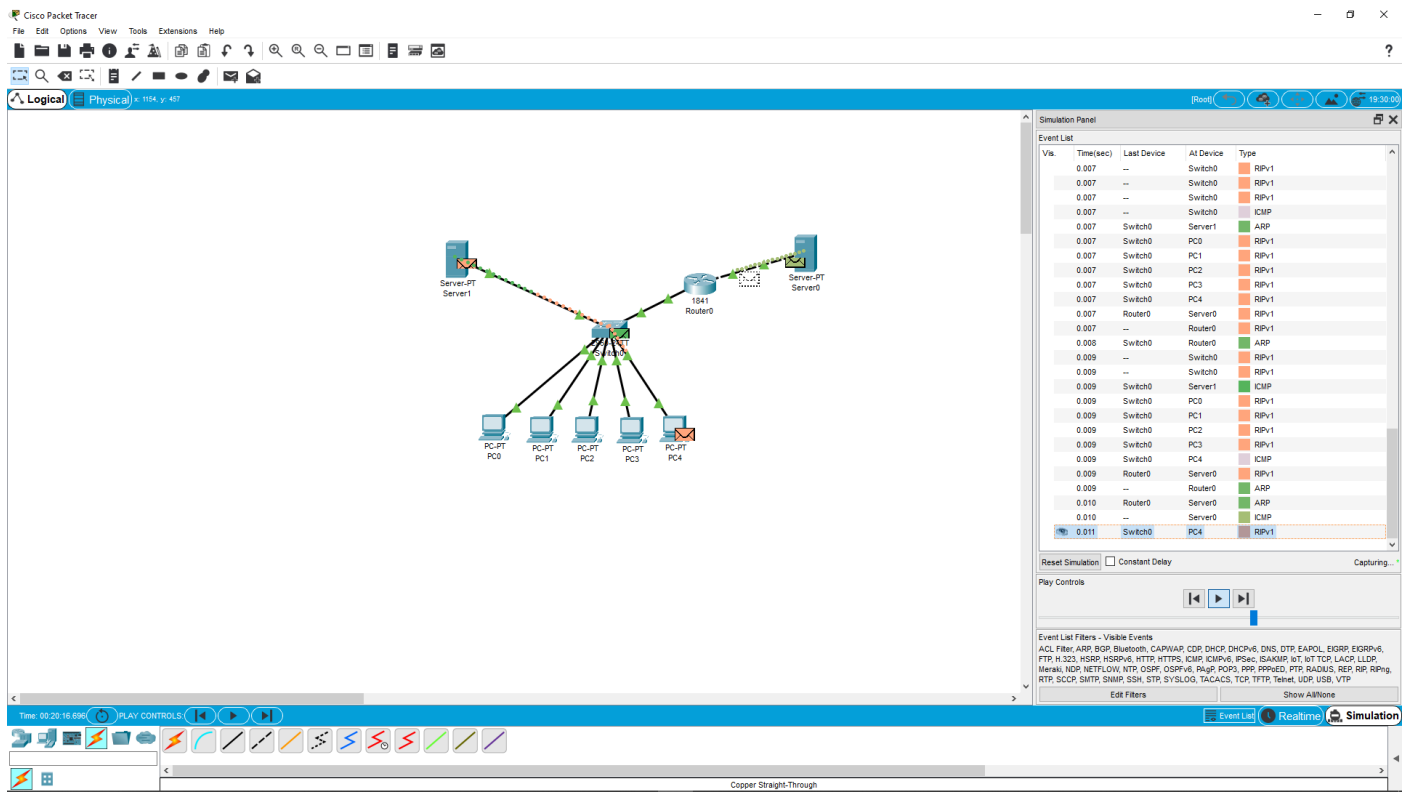

TASK 4.3

The screenshot shows the configuration interface for Router0. The 'Config' tab is active, and the 'RIP' option is selected in the left-hand menu. The 'RIP Routing' section on the right contains a 'Network' input field and an 'Add' button. Below this, a table lists the configured network addresses: 192.168.0.0 and 192.168.1.0. A 'Remove' button is located at the bottom right of the table. At the bottom of the interface, the 'Equivalent IOS Commands' section displays the following commands:

```
Router#
Router#configure terminal
Enter configuration commands, one per line. End with CNTL/Z.
Router(config)#interface FastEthernet0/0
Router(config-if)#
Router(config-if)#exit
Router(config)#router rip
Router(config-router)#network 192.168.0.0
Router(config-router)#network 192.168.1.0
Router(config-router)#
```

A 'Top' button is located at the bottom left of the interface.
